Title: Excavator and backhoe attachment adapter

Examiner: Newville, Toni

RESPONSE TO RESTRICTION REQUIREMENT

In response to the Office Action mailed November 23, 2005, Applicant restricts and traverses as follows:

Compliance with Restriction Requirement: Applicant ELECTS claims 1-14, restricting to the claims drawn to an excavator and backhoe attachment adapter.

Applicant TRAVERSES the restriction. Applicant respectfully traverses the restriction requirement on the grounds of Unity of Invention. The "manbasket" or implement claimed in claim 15 is useful ONLY in connection with the adapter disclosed and claimed in the application. As disclosed, the implement is only useful when attached to the novel adapter. The function of the adapter is to make possible the use of the implement disclosed (and other such implements having appropriate means for connecting to the

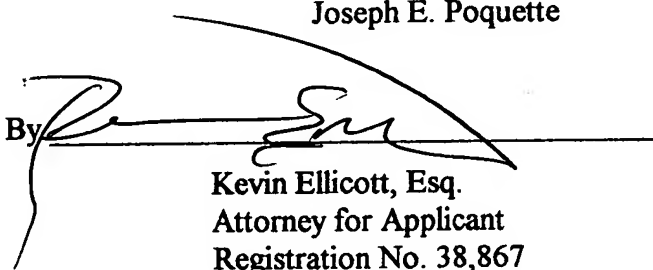

adapter). The implement must, in fact, be used with the adapter, or it cannot be used at all in connection with a backhoe or excavator. Clearly, if there is any question as to the interrelatedness of the implement and the adapter, it can be resolved during amendment through clarification of the claim language. Applicant therefore respectfully urges the Examiner to reconsider the restriction/election requirement, and allow examination to proceed on the adapter and the implement which is configured for use with that adapter.

Claims 1-15 are now in the case. Applicant restricts to Claims 1-14 and traverses the Examiner's requirement that either claims 1-14 or claim 15 be elected for examination. No fee is due.

Respectfully,

Joseph E. Poquette
